Objective

Passionate and detail-oriented Software Engineering student with strong problemsolving skills and solid foundations in Data Structures and Algorithms. Seeking an Associate Software Engineer role at PlaySimple Games to contribute to building and shipping scalable, high-quality mobile gaming solutions at speed.

Education

Bachelor of Engineering – Software Engineering

Chitkara University

Expected Graduation: September 2027

Technical Skills

- **Programming Languages:** C, C++, Java, Python
- **Core Concepts:** Data Structures & Algorithms, OOP, Recursion
- **Tools & Platforms:** Git, GitHub, Visual Studio, Online Compilers
- **Databases:** MySQL, PostgreSQL (Basics)
- **Other:** Problem Solving, Debugging, Code Optimization

Projects

Smart Lock System

- Designed a secure authentication-based smart lock using Raspberry Pi and Arduino
- Implemented user validation logic and hardware control flow
- Focused on reliability and real-world deployment constraints

WordyPy Game Bot (Python)

- Built a bot using OOP principles to solve WordyPy (Wordle-style game)
- Implemented rule-based logic using feedback interpretation
- Applied efficient algorithms to reduce guess attempts

Network Client-Server Applications

- Developed TCP and UDP client-server applications using Python
- Analyzed packet flows using Wireshark
- Strengthened understanding of reliable data transport

Problem Solving Experience

- Regularly practice coding problems related to:
 - Arrays, Strings, Recursion
 - Stack, Queue, Linked List
 - Searching & Sorting
- Comfortable writing optimized and clean solutions under constraints

Soft Skills

- Strong ownership mindset – take responsibility to code and deliver
- Collaborative team player with good interpersonal communication
- Quick learner with ability to adapt to fast-paced environments
