4. World's First Experience Center for "Future Ready Sales Team and Trade" for CPG Sales - [Salescode Experience Center](#)

Roles & Responsibilities:

- Own customer engagements end-to-end
- Work directly with customers to understand requirements, conduct discovery discussions, build demos and proofs-of-concept, deploy AI agents, and act as a technical point of contact throughout the engagement.
- Build, deploy, and iterate AI agents

- Design and prototype AI/GenAI workflows quickly, integrate with APIs and tools, monitor live performance, troubleshoot issues, and continuously improve solutions based on usage and outcomes.
- Manage the full development lifecycle
- From rapid prototyping to production deployments — including basic CI/CD practices, versioning, monitoring, debugging, and documentation of reusable best practices.
- Collaborate with product and engineering teams
- Capture customer feedback, identify gaps or improvement opportunities, contribute to feature ideas or code when required, and help strengthen the platform for broader adoption.
- Drive execution with quality and ownership
- Ensure high reliability, scalability, and quality of solutions while working across multiple initiatives in parallel.

Desired Candidate Profile

Technical Fundamentals

- Working knowledge of Python, APIs, tool integrations, and basic frontend concepts (React or similar).
- Familiarity with LLMs, prompts, workflows, and AI agent concepts is a strong plus.

Customer & Communication Skills

- Comfortable in customer-facing discussions, capable of translating business problems into technical solutions.
- Strong verbal and written communication with a problem-solving mindset.

Ownership & Mindset

- High sense of ownership, accountability, and execution rigor.
- Ability to context-switch quickly, manage ambiguity, and deliver under tight timelines.
- Strong attention to detail and commitment to high-quality outcomes.

Learning & Adaptability

- Open to feedback, fast learner, and able to adapt in a rapidly evolving AI environment.
- Curious, proactive, and willing to go beyond defined responsibilities when needed.

Experience & Background

- 1–3 years of relevant experience in engineering, analytics, consulting, or product-focused roles.
- Background in Computer Science, Engineering, Analytics, or related fields preferred.

What's on Offer

- Opportunity to work with top professionals and experts in a mission mode, to lead and contribute to the creation of a Global company.
- Create value for the customers, engage with top Global brands and CXOs, and help them experience the Future of Sales.
- Be a part of Wealth Creation and earn extraordinary financial benefits as a part of the ESOP plan, specially designed for high performers.
